

An open letter to President-Elect Trump from Physicists and Astronomers about the importance of fighting Global Warming

Mark Battle & Madeleine Msall, Bowdoin College & Paul Nakroshis, University of Southern Maine

Signatories to the Open Letter

(There are two sites: people.usm.maine.edu/pauln/climate and a mirror site at physicistsfortheearth.org).

Many hours of work have gone into manually looking up every department chair (or, for smaller programs without a chairperson, a selected physicist in the college or university) and sending an email to each. We periodically download, and verify the signatures for each signatory.

We began gathering signatures on December 5, 2016. Faculty that have signed will have their name added below the respective institutional name below. These are arranged alphabetically by State, then Institution Name, and then last name of signatory.

As of 17 Jan 2017 @ 20:08 hrs, there are **706** signatures.
